RISK AND COMPLIANCE MANAGEMENT

Our mission

Holistic risk and compliance management for sustainable business development

CONFIDENCE

We let our technology speak for itself and provide fully-featured versions of our products to our clients for free trials. This shows our confidence in the product and helps to get down to business in every deal, instead of going through multiple rounds of marketing meetings and sales presentations. This ensures both transparent and efficient decision making process for our clients and positive results. Besides, during this proof of concept stage our clients get acquainted with their future account managers and support, and complete in-depth risk management training.

CLIENTS ARE ON THE TEAM

When developing new features and products, SearchInform looks to clients for business insights. Usually, we estimate the cost of additional development taking into account the preferences of all groups of our clients. SearchInform work with customers on site, in our training center and remotely. We regularly run interactive webinars for our leads and clients, participate in the industry events and exhibitions in order to have a keen sense of the pulse in the community.
