Protection at the level of workstations, data channels and human-related risks

Complex risk and data management protection

RISK MONITOR COMPONENTS

Risk Monitor = DCAP + Watermark + DLP + Human Behaviour Analysis + Forensic Suit + Investigation Control

Is a single-agent comprehensive Risk Management platform. The solution ensures protection against data leaks, neutralizes human factor and protects the company from widest range of corporate fraud and internal incidents.

Risk Monitor
guards organisations from:
- Data leak,
- Corporate fraud,
- Insider-related risks.

Risk Monitor allows to:

✓ Create an effective risk management program.

✓ Prevent the widest range of internal threats.

✓ Facilitate regulatory compliance and investigation.

✓ Proactive functionality for just in time exposure of new methods for data leakage and other violations.

✓ Extended functionality for analysis of human behavior and proactive detection of possible risks.

✓ Advanced functionality for corporate investigations and reporting.
